Webmedx Appoints New Senior Vice President of Client Development, Chris Cashwell

Cashwell Brings Healthcare Finance and IT Experience to Transcription Firm

Nashville, TN (July 21, 2009): [Webmedx](#), the fourth largest medical transcription service provider in the U.S., proudly announces the addition of [Chris Cashwell](#) to the position of Senior Vice President of Client Development. With twelve years experience in business development for GE Capital and three years specifically focused on the healthcare sector, Cashwell assumes national leadership responsibility for all new business development and sales.

Prior to joining Webmedx, Cashwell worked directly with some of the nation's largest health systems and purchasing groups. In addition he is considered a leading healthcare expert to Hedge Fund managers and equity investment firms on a variety of healthcare technology issues.

"Chris's knowledge of healthcare financing and purchasing organizations is a valuable asset to our customers as they further invest in electronic records and work towards achieving meaningful use of their systems," mentions Jay Cannon, President and COO of Webmedx. The company provides transcription service and technology solutions including speech recognition that supplement EHR adoption and automatically abstract data from clinical documentation for quality reporting and other purposes.

The company's dedication to U.S. based transcription services; service excellence and customer satisfaction drew Cashwell to Webmedx and has led to a successful partnership. "It is refreshing to join a company where every client can be referenced and every employee is dedicated to growth," he states. "Just as important, Webmedx's commitment to the clinical documentation industry and long-term dedication to improving outcomes while also reducing costs was a critical factor in my decision to join the firm."

About Webmedx

Webmedx, Inc. is the premier supplier of medical documentation services for hospitals and clinics nationally. The company designs and implements customer-centric documentation solutions using the most credentialed domestic workforce in the industry and its own enterprise-class, intelligent speech recognition and content management technology platforms to deliver the highest-quality clinical documentation possible supporting patient care and safety.
